Hotel Courtesy

Not all Hot Wheels® collectors and their families keep late hours. Some collectors' rooms may also be located near non-Nationals guests. If you are in the halls late at night or early in the morning, please be courteous and keep the noise level down. Trading, etc. is not to be conducted in the hallways, and not allowed in any public area of the hotel. To be considerate, after 11 p.m., please do not keep your room door wide open. We suggest propping it if you don't want to close it all the way or using doorknob hangers. This lets people know you are "open" yet keeps the noise filtering into the hall to a minimum. Example: No mirror bases or platforms of any kind are allowed. You **must** enter your cars in the correct category. For security purposes, you must have a picture ID to pick up your customs at the end of the event. There is no limit on the number of cars you can enter, but we ask it be kept to about 5 per category depending on table space.

Tips on entries: A single entry can consist of 2 vehicles (ex: the Elwood flatbed & car or a tow truck pulling a car). Results from past contests shows this adds to your advantage as this shows "more time spent." Judging is based on overall appearance and clean execution.

We'll be open on **Friday, April 6**, if you'd like to display your masterpiece early. We'll have an area for displaying customs that are not being judged. We encourage you to use it to show your talents!

*****MANSON CHEUNG**

Working behind the scenes at Mattel for over seventeen years, Manson graduated as a Toy Design major from Otis College of Art and Design. In his first few years at Mattel he worked in the Games and Puzzles group and Hot Wheels® group. Eventually Manson settled in the 3D Design Group, where his model making and sculpting skills were used by all the departments within Mattel.

Manson has a unique job at Mattel, he takes the designs from the Hot Wheels® Design team and translates it to a 3D prototype. Although he has sculpted cars by hand, like the '70 Plymouth Barracuda and Low Flow for the 2004 line, he now uses FreeForm, a computer modeling program to make 3D models. Since 2007, Manson has been mainly working on Hot Wheels® mainline cars. He has worked on over 600 cars.

In addition to modeling cars, Manson has also designed about 25-30 cars for Hot Wheels® in the Basic Mainline and Adult Collector Lines. These include, 1981 DeLorean DMC-12, all the Back to the Future Time Machines, various Batman vehicles, A Team Van, Mystery Machine, all the Ghostbusters Ecto cars, The Simpsons cars, Snoopy, and others to come. Julian graduated from Academy of Art College with a major in illustration, and a minor in 3d modeling. Prior coming onboard at Mattel as a packaging designer, Julian had worked as an illustrator, and a product designer at various consumer product companies.

***** MICHAEL HERALDA - Retired...**

Graphics Designer Hot Wheels® 1997 – 2005 plus a few models from 2015, 2016 & 2018!

Michael joined the Mattel Team in 1996 as Manager of the Mattel Sports brand. In 1997 he became the first in-house graphics designer for Hot Wheels®. The very first model he designed graphics for was the 1998 1st Edition Ford Escort Rally. Over the next eight years he created graphics for the Core Line, Multi-Packs, Treasure Hunts, Toy Fair, Dream Halloween, and various other "collector-type" models. In 2005 he became part of the Matchbox® brand and remained with that team until his retirement in June of 2015. Over the course of his tenure with both brands (Hot Wheels® and Matchbox®) he created over 5,000 decorations! But retirement has not stopped him from contributing decorations for both brands - as a freelance graphics designer.

Prior to retiring from Mattel, he decided to commemorate his Graphics career with a Hot Wheels® decoration on a Ford Fiesta that mimicked his very first design on the 1st edition Ford Escort Rally. In addition, he created four other Matchbox® models to serve as a support team for his last Hot Wheels® design – carrying over the same theme. Michael said, "I thought it would be fitting since I worked on both brands that I should also unite them (Hot Wheels® & Matchbox®) for any collector that wants to complete a set, my last set!"

"I had a job many people envy. I kind of fell into it and loved every aspect of it. I had the opportunity to work with some of the most talented people in the design and toy world and who possess a passion for what they do and create. I was inspired by them every day to do the best I could on every project. But that was only half the joy of my job. The other half was meeting the people, the collectors who also share a passion for the small gems we call die cast."

Michael's more recent graphic design contributions to the Hot Wheels® line include:

2015 - Combat Medic® # 047 / Rescue Duty® #046 / Super Van #055 / Quicksand #111 / Poppa Wheelie #115

2016 - '52 Hudson Hornet #097 / '12 Ford Fiesta #157

2018 - 9-Pack Exclusives (four models) / Mystery Models®: #07 Chicane® / #10 Mazda RX-7 / #02 Ford GT / #05

Corvette Grand Sport / #11 Pass' N Gasser™ / #03 Carbide® / #09 F1 Racer / #12 '70 Ford Mustang Mach 1

***** BOB ROSAS – Design and Engineering**

It was 1968 and Hot Wheels ® were the hottest new toys for boys. Mattel used all its resources for design, engineering, and tooling and they were looking everywhere especially in the southern California area for vendors and contract people to help them. Why vendors and contract engineers, designer's etc.? Because they didn't have the staff for all the help they needed.

At the time, Bob was doing contract engineering on tooling. The company he was working for was one of several that got contracts from Mattel to design the molds for toys and especially Hot Wheels®. He didn't think much of it at the time but there he was designing a multi-cavity tool for Classic 32 Ford Vicky toy number 6250. This was the first of about 24 different ones that he worked on. He was working in Fullerton CA and would go into Mattel in Hawthorne CA once a week to get approval on the drawings. He was asked to join one of the Mattel Subsidiaries called Optigan and not too long after that he was hired to work at Mattel in Hawthorne. He started out working tooling and then engineering and design for Barbie accessories, preschool toys and Big Jim before he was assigned to the Hot Wheels® group. The first car he worked on was the Baja

Bruiser whose concept was by Larry Wood. He continued working on the designs for hundreds of cars over the

years. Eventually he managed the design and engineering group for Hot Wheels® and directed many people on cars and sets until he left Mattel in 1989. His group also did Masters of the Universe and Wheeled Warriors.

During those years, some of his biggest endeavors were his involvement in the beginnings of the tampo printing process. Some of the other projects were Sizzlers®, Thunder shift 500, Machine Paks, Thrill Drivers Corkscrew, Mean Machines (motorcycles), The collectors patch series, The Heroes, Scene Machines, Spiderman's "Web of Terror", Scorchers, The collector books from 1981 and 1982, Steering rigs, Steering rig cabs, Sto and Go's, Mega Force, Truck Company, Shift Kickers, Power Devils, Ultra Hots. Real Riders, Metal flake paints, [Crack-Ups](#), Zap 'N Go, XV Racers and many others.

Larry Wood and Bob Rosas worked together for many years and one of their personal projects was to promote the idea that we should make cars that appealed to an ever-growing collector market. We became aware of the interest in collecting Hot Wheels® by grown men and women probably as far back as the late 70's. As a result of this he encouraged Mattel to make more classic cars and the cars with the "real rider" tires.

Bob has BS degrees in Engineering and Industrial Design from Cal State University Long Beach California

*****CHRIS WALKER**

Chris Walker "Night Stalker" burst onto the die-cast scene customizing cars for competition. After winning multiple awards, he focused his attention towards high-end custom pieces for celebrities and famous designers. His work is on display at Foose Designs, was displayed at Mattel for Elliot Handlers Birthday, and is currently the only die-cast customizer to have his work appearing in the Hot Wheels® exhibit in the Peterson Automotive Museum in Los Angeles, CA. Expanding out into the die-cast world, he started doing freelance work in packaging and graphics for various die-cast companies, and doing event cars for various U.S. and International conventions.

Chris was inducted into the first year of the Die-cast Hall of Fame in 2009 and is the only member to hold 3 rings. He has been featured in various automotive and hobby magazines for his work, and even had a hand in designing his own casting, The Dreamliner for his own company. Currently he has now turned his attention towards writing a few collector books, The Ultimate Guide to the Hot Wheels Drag Bus, and the Ultimate Guide to Steering Rigs, co-written by Joseph Wiggins. Still going strong in the die-cast world, he has no plans to stop. "It's way too much fun!"
